Nariman Heshmati, MD Vice President	Olympia, WA 98504
John Bramhall, MD, PhD Secretary-Treasurer	Ms. Beyer,
Jennifer Hanscom Chief Executive Officer	On behalf of the Washington State Medical Association, representing more than 12,000 physicians and physician assistants across the state, as well as our undersigned physician partner organizations, thank you for your work to implement House Bill 1688 from the 2022 legislative session and the opportunity to provide comment on the prepublication draft rule R 2022-02.

While most of our suggestions from the CR 101 phase were not incorporated into the prepublication draft rule, several were and we are grateful for those inclusions. We have a number of outstanding concerns about the current proposal, but our comment will focus on the importance of stipulating that the first three months of payment under an AADR be explicitly required to be paid at billed charges.

Throughout the discussions on HB 1688 during the 2022 legislative session, it was repeatedly noted by the OIC that a carrier would be required to reimburse a provider party to an AADR at the provider's billed charges. This tracks with WAC 284-170-210, but the law does not explicitly require carriers to reimburse at billed charges, instead directing that AADRs "may result" in payment at billed charges.

In the interest of incenting carriers to negotiate with providers potentially subject to an AADR, requiring carriers to reimburse providers at billed charges for three months was a central piece of the negotiations on Section 18 of HB 1688. This maintains an equilibrium of incentives where carriers want to avoid paying billed charges and physicians want to avoid being locked into an arbitrated rate for the remainder of the year, forwarding the shared goal that voluntary contracting remain the expectation and norm.

To ensure this equilibrium it must be specified that for those AADRs that include services covered by the BBPA, carriers are explicitly required to reimburse at billed charges for the three-month period that precedes the ability to petition for arbitration to establish a commercially reasonable payment rate for the duration of the AADR. We see this as a critical component of ensuring the compromise that was reached on HB 1688 is reflected in practice on the part of entities who will be entering into AADRs.

To reflect the compromise reached on HB 1688, language should be added to proposed WAC 284-170-220 on page 85 of the prepublication draft rule as follows:

> Seattle Office 2001 Sixth Avenue, Suite 2700 Seattle, WA 98121 o/206.441.9762 fax/206.441.5863

(b) The amended alternate access delivery request must include attestation from the issuer of reimbursing the provider at billed charges for the 3 months after the effective date of the alternate access delivery request approval by the commissioner.

Elsewhere in the prepublication draft we are appreciative of the stipulation that a single instance of arbitration will establish reimbursement for the duration of an AADR, and that AADRs will be limited in duration to one year, both of which were prior requests of WSMA and the physician community.

Thank you for your consideration. We look forward to continuing to work together on the implementation of the law and we welcome knowing if there is additional information we can provide.

Sincerely,

Sean Graham Director of Government Affairs Washington State Medical Association
